PROFESSIONAL SUMMARY

Technical Lead with 9+ years of experience designing and delivering enterprise software solutions across hospitality, healthcare, travel, education, e-commerce, transport, and finance domains. Skilled in solution architecture, full-stack development, AI-assisted software engineering, and technical leadership. Proven ability to lead engineering teams, mentor developers, and deliver scalable, business-critical applications.

AREAS OF EXPERTISE

- Technical Leadership
- Solution Architecture
- System Design
- Full-Stack Development
- AI Engineering

ACCOMPLISHMENTS

- Winner – **SLASSCOM National Ingenuity Awards 2024**.
- Winner – **Yarl Geek Challenge Season 8** (Team *mAgenda*).
- Promoted from **Associate Software Engineer** to **Technical Lead** through consistent technical excellence and leadership.
- Successfully led the delivery of enterprise software solutions and mentored engineering teams

EMPLOYMENT HISTORY

Jan 2024 — Present

Technical Lead, Apptimus Tech (Pvt) Ltd

- Lead a team of **5–7 software engineers**, delivering enterprise-scale web and mobile solutions across hospitality, healthcare, travel, transport, finance, and education domains.
- Mentor 3-5 **developers** through technical coaching, architecture guidance, code reviews, and knowledge-sharing sessions to improve engineering quality and team capability.
- Successfully led **15+ production releases**, coordinating cross-functional teams to deliver stable, high-quality software on schedule.
- Drive solution architecture, system design, and technical decision-making to build scalable, secure, and maintainable enterprise applications.
- Establish engineering standards, Agile delivery processes, code quality practices, release management, and technical governance.
- Collaborate with business stakeholders to translate complex business requirements into scalable technical solutions.
- Lead the architecture and delivery of enterprise platforms across **hospitality**, **healthcare-**, **travel**, **transport**, **finance**, and **education domains**, including **hotel reservation**, **hospital management**, **travel distribution**, **payment**, and **operational management systems**.
- **Drive the adoption of AI-assisted software development, LLM integration, prompt engineering, and AI-powered engineering workflows to improve developer productivity and solution quality.**

Jan 2020 — Dec 2023

Senior Software Engineer, Apptimus Tech (Pvt) Ltd

- Designed and delivered enterprise-grade web and mobile solutions across education, healthcare, e-commerce, hospitality, and travel domains using Flutter, React.js, Next.js, Laravel, PHP, and PostgreSQL.
- Designed and implemented **RESTful APIs**, backend services, and scalable database architectures supporting business-critical enterprise applications.
- Developed reusable software components, application frameworks, and modular architectures to improve maintainability, consistency, and development efficiency.
- Integrated third-party services including **authentication, payment gateways, notifications, mapping services, cloud platforms, and external business APIs**.
- Optimized application performance, database queries, and system reliability through performance tuning, code refactoring, and database optimization.
- Collaborated closely with **product owners, UI/UX designers, QA engineers, and business analysts** to deliver high-quality software using Agile methodologies.

- Mentored junior developers through **code reviews, technical guidance, pair programming, and engineering best practices**, fostering continuous learning and code quality.

Jan 2018 — Dec 2019

Software Engineer, Apptimus Tech (Pvt) Ltd

- Developed enterprise web and mobile applications using modern software engineering principles and industry best practices.
- Designed and implemented RESTful APIs, backend services, and relational database solutions for business-critical applications.
- Integrated third-party APIs and external enterprise systems to extend platform capabilities.
- Optimized application performance through database tuning, code refactoring, and performance optimization.
- Contributed to solution architecture, technical design discussions, and continuous improvement initiatives.

Mar 2017 — Dec 2017

Associate Software Engineer, Apptimus Tech (Pvt) Ltd

- Developed responsive web application features using modern frontend and backend technologies.
- Built reusable UI components and integrated RESTful APIs following clean coding practices.
- Collaborated with senior engineers to deliver high-quality business applications in Agile environments.
- Performed debugging, testing, maintenance, and production support to improve software reliability.
- Worked with business analysts to transform functional requirements into scalable technical solutions.

EDUCATION

Master of Science (MSc) in Software Engineering, ESOFT Metro Campus

Focused on software architecture, enterprise application development, system design, software project management, and modern software engineering practices.

Higher Diploma in Science, University of Jaffna

Completed foundational studies in computer science, mathematics, and software development

GCE Advanced Level, Jaffna Vasavilan Central College

Completed GCE Advanced Level in the Science stream.

TECHNICAL PROFICIENCIES

Programming Languages:	PHP, Dart, JavaScript, TypeScript, SQL, HTML5, CSS3
Frontend Development:	React.js, Next.js, Flutter, HTML5, CSS3, Responsive Web Design
Backend Engineering:	Laravel, Node.js, REST APIs, Microservices, WebSockets, Authentication
Mobile Development:	Flutter, Android, iOS, Cross-Platform Development
AI & Automation:	Generative AI, Prompt Engineering, LLM Integration, MCP, AI Automation
Cloud & DevOps:	AWS, Docker, CI/CD, Git, GitHub, Bitbucket, Firebase
Database:	PostgreSQL, MySQL, SQLite, MongoDB, Database Design & Optimization
Architecture & Engineering:	Solution Architecture, System Design, Design Patterns, Performance Optimization
Engineering Practices:	Agile (Scrum), SDLC, Technical Leadership, Code Review, Technical Documentation, Release Management
Domain Expertise:	Hospitality & Hotel Management, Healthcare & Hospital Management, Travel & Tourism Platforms, Transport Management, Finance & Payment Systems, E-commerce Platforms, Education Technology (EdTech)
Development Tools:	Visual Studio Code, Android Studio, Postman, Figma, Firebase Console
